

1S_0 .interaction

$$q = \frac{\hbar^2}{M_n a^2} \frac{1}{|v_0|}; \quad M_n = 0.939 \text{ GeV}/c^2$$

$$a \approx 1 \text{ fm (range)}$$

$$v_0 \approx -100 \text{ MeV (depth)}$$

1S_0 : interaction between two nucleons in states of time reversal with $S=L=0$, and thus in a singlet state

(QM: ZPF ($\Delta p_x \Delta x \geq \hbar$))
